Dial 711, Connect, and Communicate

Nebraska Relay provides full telephone accessibility to people who are deaf, deaf-blind, or hard of hearing.

What is Nebraska Relay?

Nebraska Relay is a free 24-hours-a-day service that allows people who are deaf, hard-of-hearing, and/or deaf-blind to place and receive telephone calls. Nebraska Relay users can communicate freely with businesses, friends, or family who use a standard telephone.

All calls are strictly confidential and no records of any conversations are maintained.

Voice Relay for Hearing Callers

711 or 800-833-0920

Standard telephone users can easily initiate calls to TTY users. No special equipment is needed. You can use any type of phone from anywhere. The relay operator types the hearing person's spoken words to the TTY user and reads back the typed replies.

How to contact a person who uses a TTY

- 1** Dial 711 (or 800-833-0920) You will hear "Nebraska Relay Operator # (each relay operator has a unique identification number) may I have the number you are calling please?"
- 2** Give the relay operator the area code and telephone number you wish to call and any further instructions.
- 3** The relay operator will process your call. When the TTY caller answers the call, the relay operator will type what you say to the TTY caller. Make sure to say "Go Ahead" when it's the TTY caller's turn to respond.
- 4** The TTY caller will read what was said on the device. The relay operator will then read aloud everything the TTY caller types to you.

TTY Relay

711 or 800-833-7352

A person who is deaf or hard of hearing can use a TTY to type their message, which is read aloud to the other caller by a relay operator. The relay operator types the spoken message of the hearing caller to the TTY user.

- 1 The TTY user types a conversation to the relay operator. Remember to type "GA" (Go Ahead) at the end of each message.
- 2 The relay operator then voices the typed message to the other party.
- 3 After the TTY user types "GA," it is the other party's turn to respond.
- 4 The relay operator relays the other party's spoken words by typing them back to you.

TeleBraille Relay

711 or 800-833-7352

People who are deafblind or have low vision can use a TTY and/or TeleBraille device to type words to a relay operator, who then speaks the typed words to the other caller, and types all spoken words back to the deafblind caller. The average typing speed is slower than traditional TTY relay, and can be modified to as slow as five words per minute.

- 1 The other party's conversation to a deafblind caller goes through a relay operator.
- 2 The relay operator types the other party's conversation to the deafblind caller.
- 3 The deafblind caller reads the conversation through a TeleBraille device.

Voice Carry-Over

711 or 877-564-2481

Voice Carry-Over (VCO) allows a caller with hearing loss to speak directly to a hearing person. When the hearing person speaks to a VCO caller, the relay operator serves as the VCO caller's "ears" and types everything said to the VCO caller's TTY or VCO device. If an elderly person with progressive hearing loss has difficulty hearing over the phone, VCO may be the perfect communication solution for them.

- 1** You speak to the other party.
The other party listens and speaks.
- 2** The relay operator types the other party's voiced message to you.
- 3** You read the other party's voiced words on your VCO phone or text telephone/teletypewriter (TTY).

Other Relay Features

International Calling

Nebraska Relay allows you to place and receive calls to and from anywhere in the world (using English or Spanish language only). Calls originating from a country outside of the US may also access Nebraska Relay by dialing 605-224-1837.

Answering Machine or Voice Mail Retrieval

TTY/VCO users can request Nebraska Relay to retrieve messages from their voice answering machines or voicemail.

Directory Assistance

Nebraska Relay will relay Directory Assistance (DA) calls (i.e to 411) between TTY/VCO users and the Local Exchange Carrier (LEC) DA operator. Once the caller makes the request, the Relay operator will contact the appropriate LEC DA operator. After obtaining the requested telephone number, the caller may choose to place the call through Nebraska Relay or dial it directly.

TTY Pay Phones

TTY users who wish to use a coin TTY pay phone can use Nebraska Relay to assist in connecting calls. TTY pay phones may be available at hospitals, airports, train stations, hotels, libraries, museums, government buildings and freeway rest stops. All local calls from TTY pay phones are free of charge.

Dial 911 for Emergency Calls Only

In case of emergency, TTY users should call directly to the 911 emergency services center for their community.

The 911 operators have TTY machines and are trained to respond appropriately to TTY users. **711 is NOT a substitute for TTY users requiring emergency services.**

TTY users who cannot obtain emergency service via 911 may call 711 and inform the Relay operator there is an emergency situation.

PLEASE NOTE:

Calling through Nebraska Relay may take longer than calling 911 directly.

Equipment Distribution Program

Nebraska Specialized Telecommunications Equipment Program (NSTEP) is a program that provides free equipment for Nebraska residents with qualifying disabilities that interfere with the use of the telephone. Individuals who are experiencing difficulty using their current telephone equipment are encouraged to apply to receive assistive equipment through the NSTEP.

Training and equipment installation is provided at no charge.

What type of equipment is available to purchase?

- TTY, large visual display (LVD) TTYs and CapTels
- Amplified phones and ring/flashers
- Voice carry-over and hearing carry-over telephones
- In-Home Notification systems for door, phone, etc
- TTY software and corresponding modem for a personal computer
- Other adaptive equipment needed to connect to the telephone system

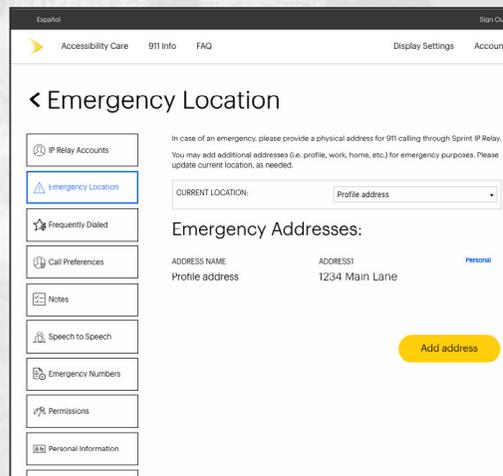

To learn more about NSTEP, visit ncdhh.nebraska.gov/services/nstep

Nebraska Relay Customer Profile

The Nebraska Relay Customer Profile allows consumers who have hearing loss to list their preferences for calls, such as:

- Frequently dialed numbers
- Emergency numbers
- Preferred gender of operator
- Announcing relay service

If you are interested in adding your information to the Customer Profile, visit nebraskarelay.com/profile.

Important information

- Spanish-to-Spanish (877-564-3503) and Spanish-to-English translation (888-272-5528) are also available.
- TTY and Voice Carry-Over (VCO) relay are not compatible with PBX systems, VOIP phones or digital landlines; a dedicated analog landline must be used.
- There is no charge for local and long-distance calls.

Request presentations

- Nebraska Relay can provide customized presentations for organizations, agencies, schools, clubs, events, or companies at no charge. The presentations talk about Nebraska Relay services and programs, and can last anywhere from an hour to a full day.
- To request, go to nebraskarelay.com/outreach
